A few years ago a decade or so, and the remarkable progress which civilization makes in the course of a brief span suddenly becomes apparent, startling clarity. Yet we do not see this extraordinary and far-reaching changes in the making, although they are going on all the time.

Turn over the faces of the family album and immediately the truth of the assertion strikes one in the face. What an extraordinary change in style of dress, in shape of hair, in fashion of hair dressing in a few years. It appears incredible that one really looked like that 20, 30 or even ten years ago.

Progress does not make a changing trend in dress alone. It invaded every realm of activity within the ken of human experience in the whole field of things material and spiritual as well as spiritual and material. It is steady and unrelenting advance that is being made.

Just back half a century ago and compare the means of transportation of that time with the world's most advanced and modernized means of transport. Contrast the crude telephone of a generation ago with the automatic and the present day. Compare the crude means of communication then with the present day. Contrast the crude means of communication then with the present day.

Why Anglo-Egyptian Negotiations Failed

British Consul Not Meet Demand For Egyptian Nationality Rights

A white paper published disclosed that the breakdown in Anglo-Egyptian negotiations which took place in London, May 8, was due to the impossibility of finding any formula which would satisfy the Egyptian demand for unrestricted immigration of Egyptian nationals into the Sudan.

The document shows that the difficulty was experienced in negotiating the Egyptian demand for unrestricted immigration of Egyptian nationals into the Sudan.

There were long discussions regarding the defence of the Sudan Canal.

At first, the Egyptian demand that the British troops should all be concentrated on the east bank of the Nile, which they subsequently refused, the British stipulation for troops to be stationed in the Sudan, the agreement could be reached on the Sudan question.
